UT673PV Solar MPPT Meter

UT673PV solar MPPT meter can effectively identify any abnormalities in solar panels by testing their maximum power, peak power voltage, peak power current, open circuit voltage, and short circuit current.

Featuring a spacious screen and automatic measurement capabilities, this device conveniently displays all measurement results simultaneously. Its portable design enables easy carrying, greatly enhancing the operational and maintenance efficiency for photovoltaic manufacturers, installers, and end users.

Lightbulb icon Large LCD with multiple readings

A single measurement that displays all essential test values can significantly enhance work efficiency.

Lightbulb icon Portable and lightweight design

With its portable and lightweight design, this meter provides operators with convenience and ease of use, making it an incredibly versatile and indispensable tool for a wide range of tasks.

Lightbulb icon Equipped with MC4 solar panel connector

With the MC4 connector already included, there is no need for additional solar panel connectors. This enables quick and efficient measurements to be performed effortlessly.

Lightbulb icon MC4 connector wrench

Say goodbye to the frustration of removing MC4 connectors from solar panel output cables! The MC4 Connector Wrench is here to revolutionize your maintenance routine.

Lightbulb icon Power supply

There is no requirement for batteries as the measurement can be effortlessly performed for extended periods.
